

TECH BULLETIN

Tech Bulletin Prepared By VP's Quality Control Team

Late Model Plus Advanced Color Change

This tech bulletin is to bring awareness to our customers of a color change to Late Model Plus Advanced from light yellow to blue. Don't worry, this fuel is still the same consistent formulation that racers can rely on time after time. VP's quality control team inspects every fuel component that enters into production to ensure the integrity of the components before it is ever made into fuel. VP made this color change at the request of our racers to help see the fuel level in fuel cells while fueling. The first batch of the new color LMP Advance was released in August, 2022.
