

TECH BULLETIN

Tech Bulletin Prepared By VP's Quality Control Team

Octanium Reformulation

We are committed to continuously improving our products to meet your needs and exceed industry standards. As part of this commitment, we are updating the formulation of our Octanium product. This bulletin provides detailed information about these changes and their benefits.

Changes in Formulation, Color, and Smell

- Color: The color of the product will transition from light green to amber.
- Consistency: The product will be slightly more viscous.
- Smell: The product will smell differently with an essence of ammonia.

Benefits of the New Formulation

The updated formulation offers a couple advantages:

- Improved octane response, facilitating more efficient fuel combustion.
- Enhanced combustion cleanliness.

Our Commitment to Quality

We assure you that these changes will not compromise the quality or reliability of our product. The new formulation has undergone rigorous testing to ensure it meets our high standards and delivers the performance you rely on.
